One Act Plays To Be Given March 1

Casts Representing Faculty, Sophomores, Freshmen Are Selected

On Friday, March 1, casts representing the freshmen, the sophomores, and the faculty will present three one-act plays in the college auditorium. The student plays will be directed by Mary Huntley and Jean MacKeely. The faculty production will be directed by Miss Katherine Hughes and Mrs. Donald Stillman. Donald Dr. takeing Edward J-lartmann, Edson Shannon, Dispatch for the winner. The attend and performances.

Honor Roll

The following students made an average of 85 per cent or better during the first semester 1934-35:

<table>

Director Addresses Government Group

Edwards Elected Debating Manager

Game Scheduled For Friday At Coughlin; Team Wins Two

Three more campus remains on the basketball schedule for the Bucknell University Junior College. Tomorrow night McKeel will meet strong opposition in the Wyoming Seminary games, which will be played in the Wyoming Seminary games. There should be a hardest fought of the games. The contest will be played on one because of a schedule alteration in the game.

In the first game of the evening, Bucknell University Merchants went down 23-14, in the second game, and a new record was set in the first and second games. Carrol was high scorer with 11 points. Donald Dr. on the Junior College team, was next highest with 10 points. The following players took part in the game: Donald Dr., Jack O'Donnell, Jack, Donald Dr., Robert J. Shriver, Charles Thomas, Captian Kolanko, George, and Donald Dr. Harvey Harrison and Melshirt.

To January 15, the Junior College team will premiere against the team of College at Hamilton College. The game will be starred for the local team. The game was outstanding, scoring 21 points.

(Continued on Page 1)

Engineering Club Will Hear Prof. Garman

Warren De Witt Garman, assistant professor of mechanical engineering on the campus, will speak on "The Engineer and Some of His Problems" at the meeting of the Engineering Club this evening. Everyone is invited.

The Engineering Club, together with the Science Club and the Mathematics Club, is arranging to give a series of demonstrations before the science clubs of the various team schools of the community. This plan is part of the effort made to increase the interest in engineering and to maintain a common ground of fellowship between the freshmen and sophomores engineering students. Anthony Yodis is chair man of the club. The officers are James Burns, assistant engineer, and George Smith, draftsman.

Dr. Eisenhauer To Attend Conference

Director John H. Eisenhauer will attend the annual meeting of the American Institute of Mining and Metallurgical Engineers at the University of Pennsylvania in Philadelphia. The conference will be held on the various phases of the Junior College movement. The plenary addresses will be delivered by Dr. George C. Conklin, president of Bucknell University Junior College, and Dr. George S. Stimson, professor of education, who will speak on the subject of Independently. Directors of Junior College from all sections of the United States will attend the convention.
An Apology And A Promise

The recent controversy over the Student Government's refusal to commit one of the inexorable aims of journals—"the publication of information)—the uncertainties arising out of the financially-free "The Bison Stampede" made it necessary for us to cancel the issue of February 1st until the budget difficulties were cleared out. We must apologize for this cancellation. This has been a trying period, barring unforeseen occurrences, the delay of more than a week is not unusual. Although the spring vacation will be over within a week, it is likely that one of our regular publication dates, we are planning six more issues for the remainder of the term.

A Word of Appreciation

Dr. J. Oria Oliphant, who, for the past semester, has been guiding this publication, is a part of the equipment of the physics laboratory at Bucknell University. An instrument, called the cathode ray oscillograph, consists of a cathode ray tube, a fluorescent screen, a magnetic strip, and a set of Wirgeman's tubes, these producing an electrical impulse if desired. The cathode ray tube is applied in many laboratories in the study of the nuclear reactions of matter. It is also used in recording the path of electrons in the vacuum of a tube, to this end being a valuable tool in the study of nuclear physics.

The evacuated glass vessel, in which a stream of the cathode emitting deflected plates, at right angles to each other, is mounted in a magnetic field. To one pair is applied voltages which increases linearly with time. By combining two forces and applying them to the electron beam, the beam is caused to move, and to write its motion on the fluorescent screen which forms the cathode ray tube. When the two waves occur at the same frequency, the wave is detected by a photoelectric cell, which is then photographed if desired.

The instrument is applied in many laboratories in the study of the nuclear reactions of matter. It is also used in recording the path of electrons in the vacuum of a tube, to this end being a valuable tool in the study of nuclear physics.

A Word To The Wise

By Jean Armstrong

An instrument of which means by which an electron beam is deflected, is a part of the equipment of the physics laboratory at Bucknell University. An instrument, called the cathode ray oscillograph, consists of a cathode ray tube, a fluorescent screen, a magnetic strip, and a set of Wirgeman's tubes, these producing an electrical impulse if desired. The cathode ray tube is applied in many laboratories in the study of the nuclear reactions of matter. It is also used in recording the path of electrons in the vacuum of a tube, to this end being a valuable tool in the study of nuclear physics.

Twelve Candidates Report for Boxing

George Saunders, Y. M. C. A. Instructor, Will Be Coach

More than twelve candidates for the Junior College boxing team presented themselves at the Y. M. C. A. last Tuesday in answer to the first call for prospects. The team will be coached by George Saunders, formerly a box-fighter. He has the confidence of the squad and a predicted success may still elude the society. More matches with freshman teams from Pennsylvania State College, Bucknell University, and other eastern college teams.

In the only match last year the Junior College team was defeated by the Meyers High School team. The Bucknell boxers, however, were handicapped in matches and were lacking in student boxing. The team this year has none of these obstacles to face.

Some of the outstanding contenders are the Mayo brothers, Joseph, Frank, Thomas, and Robert; Paul van Dornick; Max Edwards; Stanley, Thomas; Charles; Batten; and George O'Donnell; Lazarus Weiss, Hubert Hart, and Joseph Secunda.

Best Seminary

Book News

of thought and feeling. Steinmetz has demonstrated clearly that the camera can not only record, but also convey succinctly and deeply perceptive artistic idea, providing the force of life, a manifestation of "Vision in the Camera" as it is called.

In the book "America and Alfred Stieglitz" which is an attempt to analyze the work and career of a man rather than a collection of tributes, we realize that the work of Stieglitz is only important when it affects his art. It is possible, then, to attempt a biography of the man, for it is the man, rather than the techniques of his art in recent years. How important his work is, is impossible to estimate. His influence is divided into the channel of art expression. Does the influence come from the practice of those who have been influenced by Stieglitz or is it possible that those who have been influenced by him have adapted it into their own style. He stands as the Walt Whitman of art.

The reading is not difficult, it is done with a deftness entitled "The American Place", by Dorothy Norman—urgued.

Edwards Elected Manager

(Continued from Page 1)

Wyoming Seminary, Dr. Irving Churchull, faculty director of debating, was one of the judges of the debate and presented the prize of twenty-five dollars to the best speaker to Mayor Abramson.

About a dozen replies have been received from various eastern college debating teams. It is likely that the Junior College will arrange debates with Elizabethtown College, Penn State, and TCN. Arrangements are being made to have the debate within the society's territory to speak before different groups in the community.

The society which has never taken an active interest in the work business. They will meet on Wednesday evenings at 8:00 p.m. at the home of Miss Mayo, William Orland, Lorna Russell, Dorothy O'Donnell, John Lykins, Orland, and John Lykins. Officers for the season are: President, Thomas Mayo; Secretary, Justin O'Donnell; Registrar, Ralph Ford; Corresponding Secretary, T. C. N. N.; and Treasurer, Dr. Edwards. Dr. Edwards has urged the group to put forth greater effort as the active devotion of their lives. Students seriously interested in debate and literary classes are urged to join the society. More frequent meetings will be held in the future.

Administration Makes Known Proposed Curriculum Changes

According to a statement issued recently by the Director, Dr. John H. Eisenhauer, several important improvements in the curricula next year, some of which will affect the Junior College. The purpose of these changes is to make possible the earlier study of "tool subjects," earlier specialization and a reduction of the number of lecture courses for men and sophomores. "Virtually all curricula of the first two years will be modified by extending the third time within which a student may take courses," Eisenhauer announced.

One of the most important improvements will be the introduction of a four-year sequential course for the training of private accountants. This new feature of the curriculum leading to the Bachelor of Science degree will be made by introducing both shorthand and typing courses as requirements. The freshman and sophomore years of this course will be the same as the corresponding years of the Commerce and Finance Courses, except that in the sophomore year Stenography and Typing will be substituted for Economics courses.

The following courses will be required for the major work in the Physical and Biological Sciences and will be introduced to the College in the fall term at Lewistown, World Literature or the History of Western Civilization, English Composition, English Literature, Survey of Mathematics, English Composition, World Literature, Economics.

In the Bachelor of Science degree in Mathematics, English Composition, History of Western Civilization, Physical Sciences, Social Institutions or Psychology will be included in the curriculum. In the Bachelor of Science degree in Economics, English Composition, History of Western Civilization, Physical Sciences, Social Institutions or Psychology will be included in the curriculum. The required courses in the Bachelor of Science courses will be offered in the course in Business Education, English Composition, World Literature, Economics.

The purpose of these changes is to be more effective in preparing students for the introduction of "tool subjects," earlier specialization, and a reduction of the number of lecture courses for men and sophomores.

English Students To Enter Contest

Advanced Exposition Class Will Compete For Essay Prize

Junior College students who are enrolled in the Advanced Exposition Class in the Junior College will participate in the "Atlantic Monthly" essay contest. To be eligible for entrance the student must subscribe to "The Atlantic Monthly" office on or before April 8, 1936. The winner of the first prize will receive fifty dollars in cash and a scholarship to the Broad Law School, The second prize is twenty-five dollars in cash, respectively.

Mr. Stillman feels certain that this contest will be of value in stimulating interest in the new course.

Mathematics Club Will Meet

Selection of second semester officers will be held during the meeting of the Mathematics Club tomorrow evening, and another subject will be "The Integration of Mathematics into Careers and Education." The meeting will be held in the mathematics department.

Bucknell University At Wilkes-Barre, Penna.

The Bucknell University Junior College at Wilkes-Barre is a branch of Bucknell University. The admission requirements at the Junior College are the same as those at Bucknell University. Students who have earned credits at the Junior College may apply for Bucknell University credits; they will be accepted wherever Bucknell University is recognized.

Bucknell University has widened its campus to include the Wyoming Valley. Two full years of college work may be taken at the Junior College. The courses offered to freshmen and sophomore students are duplicated at Wilkes-Barre. The University has equipped expensive, modern laboratories at the Junior College in order that satisfactory courses in science may be given. No other institution offers such facilities in Wilkes-Barre. The Junior College is rapidly building up a library of its own under the direction of a professionally trained librarian.

Bucknell University also offers a wide variety of late afternoon and evening courses at the Junior College Building in Wilkes-Barre. Such courses are open to both graduate and undergraduate credit.

The Bucknell University Junior College has an exceptional faculty. Every member of the staff has graduated teaching; several have received doctor's degrees from the leading universities of America. The faculty is composed of the men who have come from the graduate schools of Harvard, Yale, Columbia, Chicago, Cornell, Stanford, Duke, Virginia, and Michigan.

For further information, consult the Registrar, George R. Faint, 29 W. Northampton Street, Wilkes-Barre, Penna. (Telephone W B-2630.) A catalogue or special bulletins will be mailed upon application to the Registrar.

John H. Eisenhauer
Director
