One Act Plays To Be Given March 1
Casts Representing Faculty, Sophomores, Freshmen Are Selected

On Friday, March 1, casts representing the freshmen, the sophomores, and the faculty members will present a program of three one-act plays in the college auditorium. The plays will be directed by Mary Huntley and Jean MacKey. The faculty production will be directed by Miss Kathryn Hughes and Mrs. Donald Stillman.

Casts will be announced in the coming weeks, and the winners of the contest will be determined by the vote of the Bucknell University alumni who will witness the performance. The students of the Wyoming Valley have been invited to attend and will be provided with tickets on which they can vote for their favorite. The contest is being sponsored by the Dramatics Society.

The freshmen play, "So Young Our Antics," directed by Jean MacKey, includes the following faculty members and students: Ann Hirtko, Robert Mayock, Jay Ackley, and Lois Devendorf.

The cast of the sophomore play, "A Dispatch Goes Home," is being directed by Jean MacKey and includes Edward Hartmann, Edson Shurley, Lorna Holbrook, and Jack O'Donnell.

The faculty will present the well-known play by Lady Gregory, "Spreading the News," written by the Portland poetess, who will be part of the cast.

Further details concerning this month's Dramatics Society meetings will be announced by Cyril Freed, production manager.

Director Addresses Government Group
Dr. Eisenhauer Speaks On Education; Scrap Book Planned

Dr. John H. Eisenhauer was guest speaker at the second dinner meeting of the Political Science Club of the Junior College at the Y. M. C. A. last Monday evening. Dr. Eisenhauer's subject was "State Control of Education." Dr. Eisenhauer, a faculty member of the college, also spoke at the recent Colgate University alumni dinner for faculty members, which was arranged by a committee of Mr. William F. Waywell, chairman, Robert Mayock, and Margaret Gage.

The club has plans for the making of a scrap book from current information on educational affairs. Various committees will be formed to select the subject areas. At the meeting on Tuesday, the club will be discussing the making of the scrap book with the chairman of the committees handling them, as follows: Supreme Court decisions, Robert Mayock; Načitology of the U. S., Robert Mayock; government, Amos Barischock; local government, Dr. Eisenhauer; and when the... (Continued on Page 3.)

GLEE CLUB PLANNING CONCERT Program Arranged For Assembly

The Junior College Glee Club will present its spring concert on March 10 in the auditorium. The club, under the direction of Dean Rush, will present a program of popular music and selections from choral literature. The program will feature a variety of songs and numbers, including a selection from "The Merry Widow" by Lehár. The concert will also include a performance by the "Merry Glee Club" of Professor Rush.

A new feature of this year's concert is the inclusion of a variety of styles and genres, from popular songs to classical works. The club has worked hard to prepare for this event, and all members are eager to share their talents with the audience. The concert is scheduled to begin at 8:00 p.m., and tickets are available at the door.

Director of the Glee Club, Dr. Rush, states, "We are very excited about this performance, and we believe it will be a great success. We have worked hard to prepare for this event, and we are looking forward to sharing our love of music with everyone who attends."

Engineering Club Will Hear Prof. Garman

Warrn De Witt Garman, assistant professor of mechanical engineering at the university, will speak on the Engineering and Home of His Problems at the meeting of the Engineering Club this evening. Everyone is invited.

The Engineering Club, together with the Science Club and the Mathematics Club, is arranged to give a series of demonstrations before the science clubs during the various phases of the Junior College campus. This plan is part of the effort being made to increase the interest in engineering and to maintain a sense of fellowship between the freshman and sophomore engineering students. Professor Garman is an engineer of the club. The other officers are James Burns, assistant engineering student; and William Styles, draftsman.

Basketball Squad To Play Seminary
Game Scheduled For Friday At Coultagh; Team Wins Two

Three more games remain on the basketball schedule for Bucknell University Junior College. Tomorrow night the Coultagh senior team will have an opportunity to enter the Wyoming Seminary quarterfinals, which will be played in the Coultagh gym. The game should be one of the hardest fought of the season between the two teams.

Last Saturday night the Myers High School gymnastic team of Bucknell University and of St. Thomas College were played on Friday, lasting two hours and forty-five minutes, with Coultagh senior team winning two games.

Reverend Schwab to Address Graduate Students

The speaker at his meeting with the German Club this evening will be the Reverend John A. E. Schwab, pastor of the First German-Evangelical Church in Wilkes-Barre. The club attended a service at Reverend Schwab's church early in January. Refreshments will be served this evening. All members are urged to be present.
To the ears of our staff has been added another of the most drastic criticisms: that our paper is in need of reform. To such accusations we offer not a meekly denied; rather, we encourage it. We believe that this friendly admonishment be accompanied by a bit of friendliness, or at least, constructive criticism. In other words, we do not attempt to demolish that you cannot possibly contemplate replacing.

From those individuals who read this paper we invite your suggestions. As a result of our recent inclusion of a Macdonald-one act plays to be given in the auditorium on Friday night, March 4. These plays can be acted in, and although the bottom for the best production is limited to the alumni, your presence that evening is most certainly encouraged. This is more so than any other group of productions. It is not by any means a laudatory over this observation, which is a notable one that considers the possibilities of a distant date this time. "Bison Stampede" will be actually read by at least one more person.

It should be common knowledge at this late date, and, if it is not, I shall try to make it such, that the Drama Department is sponsoring a Macdonald-one act plays to be given in the auditorium on Friday night, March 4. The several casts are acting in competition, and although the ballot for the best production is limited to the alumni, your presence that evening is most certainly encouraged. This is more so than any other group of productions. It is not by any means a laudatory over this observation, which is a notable one that considers the possibilities of a distant date this time. "Bison Stampede" will be actually read by at least one more person.

As a means to these ends the company has offered prizes for selling the souvenirs. The students were made aware of the available prizes and the benefits of the sale. They were also made aware of the importance of the sale. The benefits of the sale were made clear. The benefits of the sale were made clear.

Dr. J. Orin Oliphant, who, for the past semester, has been a guiding influence in the physical, moral, and intellectual development of the campus, has undertaken additional responsibilities in the form of a card catalog. Because his new duties will not interfere with his teaching duties, Dr. Oliphant will be unable to take an active interest in the publication of the student magazine. He, however, continues to serve in an advisory capacity. This is due to the fact that the student body has a long-standing tradition of seeking his advice on matters of academic importance.

A Word To The Wise

By Jean Armstrong

An instrument by means of which elementary students can observe the part of the equipment of the physics laboratory of Dr. J. Orin Oliphant. The cathode ray oscillograph, a cathode ray tube, consists of a cathode ray tube and the associated equipment.

The evacuated glass vessel, in which there is the cathode, deflecting plates, and at right angles to each other, is mounted in a magnetic shield. To the plate is applied voltage which increases linearly with time. By combining these two, an electron beam is created and applied to the electron beam, the beam is caused to be deflected by the deflecting plates, the fluorescent screen which composes the image and the driving force that occur at the same frequency, the wave is driven by the electric field and seen and photographed if desired.

The linearly varying voltage is applied in a circuit that is swept through the electron beam, thereby creating the electron oscillation. This is a cathode ray oscillograph, there is an electron oscillation circuit, a cathode ray circuit, a circuit containing inductance and capacitance and resistance.

The electrometer scale, one of the most important of the equipment of a cathode ray oscillograph, shows how the frequency is dependent, depending on the amount of current induced and the voltage induced. In the picture, the sound wave is recorded on the cathode ray oscillograph and may be seen.

As I see it

BOOK NEWS AND REVIEWS

All we know of the political moves and activities of the editors is that they are on the checkerboard of B. J. J. Some of the editors report that they plan to stay out of all such machinations and that they will resist any attempts to use "the inside dope" on these affairs. This is mainly because the Freshmen have not been involved in the Upperclassman-Varsity stage which comes usually on the fifteenth of every month.

I shall not try to give you the "inside dope," but shall continue to report the facts as I hear them.

The Forum

Group IV participates in the debate opposition to "A" and is not in intellect. The Freshmen participate in the debate opposition to "A." Unlikely to mobilize its independent membership in common effort, they are more likely to participate in the democratic demagoguery.

Group IV is not getting to much in this petty strife. When both of these groups are going to try to serve it will throw in its lot with the Freshmen faction will forward its cause.

And then we come to the referendums for the Spring 1965, which will be served up in the Fall of 1965. The Freshmen have decided to serve out their terms; some difficulties will result there. When both of these groups are going to try to serve it will throw in its lot with the Freshmen faction will forward its cause.

Social Notes

WOMEN'S TEA

The women students of the Junior College held their annual tea on Thursday, February 14, honoring Miss Kathlyn Hughes, whose engagement to Dr. I. L. Churchill has recently been announced.

Miss Brooks poured, Lois Devendorf and Eleanor Scaraman entertained with refreshments and Madame guest, received a corsage of roses and bonnet.

The committee in charge of the tea had as chairman, Sarah Phillips, who was assisted by Misses Jeanne Litney, Joyce Layne, Lois Devendorf and Hilda Fletcher.

Jean MacKeevy was present of a surprise party held at her home on her birthday, January 26.

The senior class entertained at a party at an informal party on Sunday evening, February 15.

Irena Hewitt entertained at a lunch in her home on Saturday, February 1. The following were present: Lois Devendorf, Hilda Fields, Betty Hittendorf, Sally Hinton, Mary Huntley, Ruth Gibbons, Margaret Austin, Helen Arno, Jean MacKeevy, Beverly Jones, Eleanor Scaraman, and the hostess. Eleanor Hunter, who has taken up her second semester studies on the campus at Lewisburg, was guest of honor. Tea was given by Hilda Fletcher at her home on Franklin street, on Saturday, February 2. There were 28 guests.

Duncan Thomas held a bridge party at his home on Friday, February 10. The Following were present: John McDonough, Robert Hart, Robert Maycock, and Duncan Thomas.

Basketball Squad Plays Seminary

(Continued from Page 1.)

Pennington Prep defeated Bucknell in a very close game at Mayaro High School gymnastic on January 26. The Joy Cees fought valiantly but lost by the score of 32 to 28.

At Williamsport, on February 1, the team was soundly defeated by the Dickinson Seminary team, 40 to 22. The Dickinson team was composed of the star players of last year's Williamsport High School team, which won the state championship. A rather close game with Dickinson for the second time, scheduled for February 8 at Wellen- Barre, was cancelled because of injuries suffered by several members of the Williamsport squad in an automobile accident.

Three games were played at the Guest High School on February 8, Saturday, February 8, and the third preliminary game the freshman team of the college defeated the sophomores, with Milton Charnowits, a new man, starring for the fresh. The reserve team defeated the Clinton Eagles by one point in the second game. Robert Beach scored the goal that decided the contest. In the main contest of the evening the vastly easily defeated the Scranton - Keystone Junior College team, 80-34. Mascowit of Bucknell and Phillips of Scranton - Keystone were outstanding.

Last Tuesday the J. C. team played at St. Thomas Franklin team at Scranton. Results of this game were not available before the paper went to press. The team's record for the season so far is four games won and five lost.

Science Club Members

View Partial Eclipse

On February 1, three members of the Science Club viewed a partial eclipse of the moon at the home of Victor Navikas. A 20 per cent eclipse was observed between 11:02 and 11:15 p.m. Had weather conditions been better, a 47 per cent eclipse would have been visible at about 11:30 a.m. This eclipse was first predicted in 1887 by the German astronomer, Theodor Hittorfan. The eclipse was named after Jean Armstrong, Victor Navikas, and Francis Rudnicki.

The Student Council recently granted the Science Club six dollars from the Contingent Fund of the Student Senate to carry on a photographic project. The plan calls for the photographing of various student leaders in club activities. These photographs may be published in local papers. Under the direction of Assistant Professor Gold and Victor Navikas, and Francis Rudnicki, the club arranges that it will do any photographic work desired by students.

Twelve Candidates Report For Boxing

George Saunders, Y. M. C. A. Instructor, Will Be Coach

More than twelve candidates for the Junior College boxing team presented themselves to the Y. M. C. A. last Tuesday in answer to the first call for prospective candidates. Those who turned out were coached by George Saunders, formerly a member of the light-heavy weight championship of the world and presently an instructor at the college. Coach Saunders expressed satisfaction with the squad and predicted a successful season. He has already scheduled matches with freshman teams from Pennsylvania, State College, Bucknell University, and other eastern college teams.

In the only match last year the Junior College team was defeated by the Bucknell boxers, however, they were handicapped in that they had very little coaching and were poorly equipped. The lack of convenient training quarters and the team that this year will have none of these obstacles to face.

Some of the outstanding contestants for the championship are C. T. Smith, John Tomson, and Max Edgerts, who have been voted the best boxers in this area. Edgerts is known as "The Wizard of the Ring" because of his speed and deep perceptive artist, can produce a lot of utility force in his punches. He has already given two exhibitions in defense of his title, and each time he has surprised his opponents with his sudden changes of tactics, and has taken them by surprise. His combination of forces of life, a manifested "vision of life" that he has been described as "The American Stijtigita," which is an attempt to analyze the work on the part of the artist, he has been widely praised for his skill in handling a camera. His photographs of architecture and landscape have been published in many magazines and newspapers.

The reading of at least one chapter of "The American Nobody" would be a good service for the country. More people need to be aware of the importance of art and its role in society, especially the arts at the present time.
